SUMMARY

Committed to a software engineering career since high school, I am a proactive and collaborative developer passionate about mastering new technologies. I am seeking a professional environment to grow under experienced mentorship, refine my technical expertise, and contribute meaningfully to the company's success.

SKILLS

Programming Languages: Javascript, Typescript, Java.

Frameworks & Libraries:

Back-End: NestJS (TypeScript, Prisma, TypeORM), Spring Boot (Java, JDBC).

Front-End: React.js (JavaScript, Hooks), Next.js (TypeScript, TanStack Query, Custom Hooks).

Tools & Database:

Databases: MySQL, Redis.

Development Tools: Git, Docker.

PROJECTS

1. CINEMA BOOKING

Team: 04 members | **Role:** Full-Stack Developer

Overview: Built a scalable movie ticket booking system with multi-branch management, online payment, and role-based dashboards for Admin, Manager, and Staff.

Tech Stack: Java 21, Spring Boot (RESTful API, JDBC), Next.js (TypeScript, TanStack Query), MySQL.

Contributions:

- **Designed** a relational database schema (25+ tables) and implemented core business logic for booking, ticketing, and movie management.
- **Built** responsive user interfaces and role-based dashboards for **Admin, Manager, Staff, and Customer**.
- **Developed** core modules, including employee shift scheduling, task management, movie news, and automated data crawler services.
- **Implemented** a conditional rating and commenting system that allows customers to submit reviews only after completing bookings for movies that have already been screened.
- **Supported** full-stack integration, system testing, and bug fixing.

2. AI MOCK INTERVIEW (AI Agent-Integrated)

Type: Solo Project | **Role:** Full-Stack Developer

Overview: An AI-powered platform that helps IT candidates prepare for technical interviews through mock interviews, CV review, and interview feedback.

Tech Stack: Next.js, NestJS, Whisper (Voice-to-Text), Qwen 2.5, Ollama, Docker, Redis, MinIO.

Contributions:

- Built an AI mock interview system using **Whisper** for speech-to-text and **Qwen 2.5** for interview questions and feedback.
- Integrated AI agents with **OLLA** to support role-based mock interviews.
- Developed data crawler services to collect IT job listings from recruitment websites.
- Built career features including job search, CV generation, and AI-based CV evaluation.
- Used **Redis** for caching, **MinIO** for file storage, and **Docker** for deployment.

EDUCATION

- **Advanced Diploma in Software Engineering (ADSE)** | Aptech | *Graduated 2026*

- **Data Science (Undergraduate)** | University of Transport Ho Chi Minh City (UTH)
| *Expected: 12/2026*
